OBJECTIVE

Detail-oriented Information Systems graduate and Fullstack & AI Engineer with a strong foundation in building scalable web applications and multi-tenant AI automation systems. Proficient in Go (Golang), PHP (Laravel), and modern JavaScript ecosystems including React, Vue.js, and TypeScript. Experienced in designing complex workflow automations (n8n), Conversational AI pipelines (RAG, LLM, Voice AI), and asynchronous task queues across the full SDLC. Proven track record in operating production low-code pipelines and re-engineering them into high-reliability backend architectures, optimizing internal systems, and accelerating delivery through AI-assisted engineering.

TECHNICAL SKILL

- **Programming Languages:** Go (Golang), PHP, JavaScript, TypeScript, SQL.
- **Front-end:** React.js, Vue.js, Tailwind CSS, Bootstrap, HTML5, CSS3.
- **Back-end:** Go, Laravel, Node.js, RESTful API Development, Distributed Systems & State Machines.
- **AI & Workflow Automation:** n8n (Workflow Automation), OpenAI API (LLMs & Embeddings), RAG (Retrieval-Augmented Generation), Retell AI (Voice AI), WhatsApp Business API (Meta Cloud API & Gupshup).
- **Database & Caching:** PostgreSQL (pgvector), Redis, Asynq (Task Queue), MySQL, SQLite, Firebase (Firestore & Storage), MongoDB (Basic Querying).
- **Tools & Methods:** Docker, Git/GitHub, AI-Assisted Engineering (Vibe Coding / Agentic Workflows), UML Modeling (draw.io, Lucidchart), SDLC (Waterfall & Prototyping).

EXPERIENCE

AI Engineer - Graduate Trainee

99.co | South Jakarta **Apr 2026 - Oct 2026**

- **System Migration & Scalability:** Led the migration of real-estate lead automation from low-code workflows (n8n) into a scalable Go and React web platform, significantly improving system stability and response speed.
- **Workflow Automation (n8n):** Built and managed automated n8n workflows connecting CRM data, WhatsApp messages, and external APIs to streamline daily sales operations.
- **AI Chatbot & Voice Call Automation:** Developed an integrated WhatsApp Chatbot and AI Voice Caller using OpenAI, Retell AI, and Gupshup to automatically answer customer inquiries, qualify leads, and schedule property site visits 24/7.
- **Smart Property Knowledge Base (RAG):** Implemented an AI search system using PostgreSQL (pgvector) and OpenAI so the chatbot can deliver accurate, project-specific property information for each developer tenant.
- **Automated Lead Follow-Up System:** Created a 7-stage scheduled follow-up system using Redis and Asynq that automatically adjusts outreach timing to working hours (WIB) and handles failed message retries.
- **CRM WhatsApp Auto-Message:** Built an automated 2-step WhatsApp greeting feature inside the CRM (via Meta & Gupshup API) to help sales agents respond to new leads instantly, complete with auto-stop logic once an agent replies.
- **Operational Admin Dashboard:** Developed an internal admin portal using React and TypeScript, enabling the operations team to easily manage property projects, test chatbot flows, and distribute leads to sales teams via Google Sheets and CRM.
- **AI-Assisted Software Delivery:** Accelerated feature development using AI coding tools while personally leading system design, database structure, API integration, and code quality review.

IT PROGRAMMER (INTERNSHIP)

PT. Prakarsa Alam Segar (Wings Food) | Bekasi **Jul 2025 - Oct 2025**

- **System Maintenance**: Identified and resolved critical bugs within the HR system infrastructure to ensure high system stability and availability.
- **Digital Transformation**: Spearheaded the digital migration of recruitment processes by transferring prospective employee document collections from Google Drive to a centralized internal system.
- **Real-time Monitoring**: Engineered a real-time monitoring dashboard using React.js and Firebase to efficiently track applicant document submission status

FULL-STACK DEVELOPER

Kenzou Drive Thru Car Wash (Self-Employed) **Aug 2024 - Jan 2025**

- **Development Methodology**: Employed the Prototyping model, conducting thorough requirements and user analysis to ensure the system strictly aligned with business objectives.
- **System Design & Modeling**: Utilized UML (Unified Modeling Language) for architectural design and system modeling to ensure a robust and scalable application structure.
- **Full-stack Development**: Designed and engineered a comprehensive car wash management application for administrators and members using the Laravel framework.

- **Gamification Integration**: Implemented gamification features, including XP, Badges, and Vouchers, to significantly enhance user engagement and customer loyalty.
- **Quality Assurance**: Validated system functionality through Black-box testing and User Acceptance Testing (UAT) to ensure high-quality software delivery and seamless user experience.

BACK-END DEVELOPER

Dicoding Indonesia | Remote **Feb 2023 - Jul 2023**

- **MSIB Participant**: Selected as a participant in the MSIB Batch 4 program, specializing in Full-stack Web Development.
- **Core Technical Skills**: Mastered professional development workflows, including RESTful API architecture, Node.js, and version control using Git.
- **Capstone Project**: Collaborated on the development of "Calculus", a calorie-tracking application, with primary responsibility for database schema design and back-end logic.

IT SUPPORT TECHNICIAN (INTERNSHIP)

Bfit Indonesia | East Surabaya **Feb 2023 - Mar 2023**

- **Technical Support**: Managed first-level technical support for hardware and software issues to ensure seamless IT operations.
- **System Modernization**: Architected and refactored a warehouse inventory system from Laravel Blade to Vue.js, creating a more dynamic and responsive user interface.
- **Inventory Optimization**: Implemented the Safety Stock method within the inventory application to optimize stock tracking and warehouse management.

EDUCATION

BACHELOR OF INFORMATION SYSTEMS

Universitas Dinamika | East Surabaya | GPA 3.74 **Aug 2020 - Apr 2025**

HIGH SCHOOL

SMA YPPI II Kapasari | East Surabaya **2018 - 2020**

COMMUNICATION

- Ability to communicate and read effectively in Indonesian, strong English reading and comprehension skills, with conversational speaking ability, and communicate effectively in Hokkien.
